MAICO

easyTymp™
Quick Guide

Preparing the Measurement

To get started, press either red or blue arrow key ◀ ▶ to switch the device on.
If you store easyTymp in the cradle, it will turn on automatically after you take the device out of the cradle.

Handling the Eartips

Choose an ear tip of the appropriate size from the ear tip set, depending on the size and shape of the ear canal and ear. Put the ear tip tightly on the probe tip.

Operating Panel

Function Keys:
- Top buttons: Function of the keys is related to the functions indicated in the display above the individual function key. (e.g. Select Test, Patient, Stop)

◀ ▶ Arrow Keys: Turn on easyTymp by pressing the right or left arrow key.
Turn off easyTymp by pressing both keys at the same time.

▲▼ Up and Down buttons: Scroll through the different easyTymp settings menu, test protocols or up and down the display.

Start the Test

easyTymp will always start within the test screen, ready to start a measurement. It will use the same protocol as previously used.

|	
03 Tymp 226Hz + Auto Reflex	When entering the Test screen, the second line shows the name of the protocol which is used.
Select Test	Opens screen with available test protocols.
Patient	From this screen you can either save data to an existing patient who could have been uploaded from your database or save data to a new client.
Stop	Press Stop to finish the measurement.

easyTymp will automatically go to the Done screen when it has finished testing.
